BUSINESS ANALYST - PORTAL

Location: Belfast

Overview

Vela is a leading independent provider of trading and market access technology for global multi-asset electronic trading. Our software enables clients to rapidly access global liquidity, markets, and data sources for superior execution. We help firms successfully differentiate and innovate in an ever-changing, increasingly-regulated and fiercely-competitive landscape, while also reducing total cost of ownership.

Vela's ticker plant, execution gateways, trading platform, and risk and analytics software deliver a unique, ultra-low latency technology stack to simplify and streamline electronic trading. We leverage the latest innovations in technology to deliver cutting-edge performance, features and reliability. Our modular stack provides access to a comprehensive set of trading, data and risk APIs and can be delivered as-a-Service from multiple co-location data centers globally.

With access to more than 250 venues, Vela provides global coverage across all major asset classes. Clients are supported by an award-winning team of technical and business experts available 24x7 from our multiple offices in the US, Europe, and Asia. Vela's clients include traders, market makers, brokers, banks, investment firms, exchanges, and other market participants.

Job Profile

We are seeking to recruit for the role of Business Analyst for our documentation portal. This position will be responsible for maintaining our application documentation portal by reviewing market changes, data and applications changes, and other changes to assure our client information up to date with current processes and system operations.

Vela provides a range of enterprise level products and solutions for commercial clients such as Tier 1 investment banks, global hedge funds and international exchanges. Our company has a broad and diverse product portfolio where our core strength centers on innovation and technology.

The successful applicant will be joining an elite group of individuals charged with implementing and delivering all aspects of Vela feed handler products. This role is focused on providing accurate information about how our software products have been designed, implemented and delivered to a common market data model that allows our customers to maintain their edge in the most challenging IT dependent sector in the world.

This will require an individual with analytic skills, meticulous attention to detail and the ability to work with multiple engineering teams and stakeholders. It will be a very challenging and rewarding role ideally suited to a person who is willing to learn and with a desire for career progression.

Key Accountabilities

- Support the on-boarding of all new market data venues required by feed handlers, market gateways and other products
- Documenting feed handler specifications and updating the customer portal documentation for new feeds and updates to existing feeds
- Development of processes and tools to enhance the quality and efficiency of market data management within Vela
- Definition and promotion of good data normalisation practice for key trading events, principles and governance
- Provision of market data content changes to the teams across the Vela organisation

Knowledge, Skills & Experience Required

Essential

- Highly motivated with desire to learn and broaden knowledge in a fast-paced environment
- Excellent documentation and presentation skills
- Effective communication – good oral and written interpersonal skills adequate for dealing & communicating clearly with people from all levels of the organisation
- Ability to multitask and prioritize responsibilities
- Ability to work as a self-starter requiring limited supervision
- Proven track record of exceptional performance, high productivity and meeting deadlines
- Understanding of the Software Development Life Cycle (SDLC) and Agile methodology
- Strong stakeholder management skills
- Excellent problem solving and analytical abilities
- A Degree (Min 2.i) in IT or Business with an IT related discipline or equivalent

Desirable

- Experience with Gap Analysis and Data Mapping
- Understanding of Financial Markets – the trading of financial instruments (Equities, Derivatives, Fixed Income, FX)
- Ability to interpret financial market data for key trading events such as Quote, Trade, Security Status and Reference data across different market data feed protocols (e.g. FIX,ITCH)
- SQL and relational database experience
- Experience with GIT and/or Help and Manual software for authoring documents
- Experience of computer programming/scripting/Linux
- Proficiency with Microsoft Office suite
