Our products empower clients to focus on their core business strengths, leveraging their trading infrastructure by relying on our technology, expertise and experience. For more information, please visit us at velatradingtech.com.

Job Profile

Recruitment is currently taking place for role of a data analyst, initially working within the DART service team in Belfast.

DART analyzes the usage of market data from market data vendors, and provides transparency of this process within the client organization. The team also provide a managed service for the administration of client's market data usage and identifying cost saving opportunities.

The successful applicant will be responsible for analyzing market data usage on behalf of our clients and working closely with them to ensure a thorough understanding of the DART portfolio of products and services. We'll expect you to train clients on our portfolio and services, as well as represent Vela products and services at client meetings. Duties will include compiling reports for various market data clients, building new reports and improving existing reports, handling client queries, and maintaining awareness of Vela's new technologies and concepts relevant to existing and future clients.

This will be a challenging and rewarding role offering a unique ability to learn the policies of many important capital markets firms and stock markets. It will be ideally suited to a person who is willing to learn and with a desire for career progression.

Key Accountabilities

- Compilation of reports for various market data clients. Provide input into the scheduling processes to drive revenue recognition tied to outstanding deliverables.
- Model and transform data using a combination of in-house tools, SQL, Looker BI Tool and Excel
- Manage new client on-boarding process, which involves communicating with sales and support teams to both manage client expectations and resolve any client issues
- Continually scrutinize and implement appropriate improvements to the fulfilment process
- Requirements gathering for ad-hoc client reports
- Work with the development teams to build requirements in order to automate tasks, generate improvements to existing reports and build new reports
- Answer client queries and be able to create different scenarios with data
- Present reports to clients and management teams in a clear concise manner
- Some travel will be required to client sites as and when required to provide training, etc.
- Any other general duties as required by the management team

Knowledge, Skills & Experience Required

Essential:

- Degree in Business, IT, Management or other related discipline
- Client focused and ability to effectively communicate with clients
- Strong and demonstrable problem solving and analytical skills
- Effective communication, interpersonal and organizational skills
- Ability to collaborate with stakeholders across multiple teams in a fast-paced environment
- Proficiency in written English and MS office / Excel

Desirable:

- SQL experience
- 2+ years' experience in a business analyst or similar role
- Experience of using Looker BI tool or similar BI tools
