Our products empower clients to focus on their core business strengths, leveraging their trading infrastructure by relying on our technology, expertise and experience. For more information, please visit us at velatradingtech.com.

Job Profile

Exciting opportunity for a strong Java Developer who has a sound understanding of web technologies, in a progressive company.

The role is based in Belfast, working on a distributed web based application. While working as part of a unified team – you will be the expert in Java.

As a result, there will be a level of freedom and creativity - the opportunity to communicate how your ideas meet specific client and business requirements and actively contribute to improving the end product.

Key Accountabilities

- Significant experience to translate business requirements into innovative technical solutions
- Capable of completing assigned tasks across the complete software development life cycle (requirements analysis, design, construction and testing)
- The ability to effectively collaborate in software development activities, while taking ownership of allocated product areas
- A team player who enjoys working with others to solve problems and sharing knowledge
- Provide regular project feedback to management

- Maintenance and support of existing product

Knowledge, Skills & Experience Required

Essential:

- Java
- Web development (HTML 5, CSS, JavaScript)
- SQL development
- XML

Desirable:

- Knowledge of deployment on Windows and Linux environments.
- C#
- Python
- Knowledge of Tomcat and web containers
- ANT
- Shell scripting
- MVC
- C++
