Our products empower clients to focus on their core business strengths, leveraging their trading infrastructure by relying on our technology, expertise and experience. For more information, please visit us at velatradingtech.com.

Job Description

The Scrum Master / Project Manager will drive the delivery of market data and market access software to financial services clients. To achieve success, you will align with the Agile Framework approach while becoming an expert in the products and platforms and developing strong partnerships with technology and business and product leaders. You will also manage at a project-level, ensuring that the end-to-end delivery of key offerings are thoughtfully organized, monitored, and communicated.

This position will plan and execute both strategic and tactical projects based on the business' objectives. Tasks will include:

- Take on a scrum master role for single and eventual multiple delivery teams
- Run scrums, stakeholder meetings
- Organize sprints, JIRA projects
- Work with Product team and Technology to define release goals that map to business / technology objectives
- Regularly communicate program / project status to stakeholders
- Drive the Agile Scrum framework within the technology organization
- Model performance excellence and mentor your team to do the same
- Support continuous process improvement and innovation

Knowledge, Skills & Experience Required

Essential:

Proven track record of success, consisting of:

- Excellent communication skills- ability to communicate clearly and effectively, both verbally and written.
- Strong understanding of software development
- Superior organizational/follow-up skills with effective capacity to coordinate and prioritize multiple tasks and projects without compromising attention to detail
- Energetic and self-motivated with keen ability to maintain order in a fast-paced professional environment
- Strong analytical skills and ability to make technical decisions, recommendations, and conclusions based upon data
- Computer literacy requirements: Outlook, Word, Excel, Power Point, JIRA
- Creative problem solving using logic and reasoning as used in programming
- Knowledge of SDLC & Agile (SCRUM methodology)
- 2-3 years managing technical projects in an agile environment
- 2-3 years project management in a software environment.
- Four-year college degree from an accredited university with a BS in Computer Science or business administration
