

## STUDENT PLACEMENT ENGINEERS

**Location: Belfast**

### Overview

Vela is an independent global leader in high performance trading and market data technology. We provide the breadth of coverage and depth of expertise demanded by today's multi-asset, multi-region electronic trading environment.

Our clients benefit from white-glove global customer support and professional services from an experienced team comprised of seasoned financial services industry experts and cutting edge technologists. We have a proven track record of powering big banks, small trading shops, financial information firms, trading venues and everything in between.

Our products empower clients to focus on their core business strengths, leveraging their trading infrastructure by relying on our technology, expertise and experience. For more information, please visit us at [velatradingtech.com](http://velatradingtech.com).

### Role Description

We are offering two placement students an exciting opportunity to join our organisation. We offer you the chance to develop new skills and gain valuable industry experience.

Your role will be to develop, test, and support high performance, mission critical software.

The placement will begin between June - August 2017 and will last for approximately 12 months.

You will be working as a full member of the team, undertaking real work of critical importance to the company and our customers. These roles include:

#### Development

- Maintaining and developing products. Technologies include Linux, C, C++ & Python

#### QA Analysts

- Helping to ensure quality software is released to our customers. Technologies include Linux, Jenkins & Python

## Dev Ops

- Creating and maintaining the internal systems for development, software building and software release. Technologies include Python, Linux & Amazon Web Services

## Knowledge, Skills & Experience Required

### Essential:

- Strong technical ability and an interest in technology
- The ability and willingness to learn new skills and technologies
- Energetic and self-motivated with keen ability to maintain order in a fast-paced professional environment
- Strong analytical skills and ability to make technical decisions, recommendations, and conclusions based upon data
- The ability to work as part of a team
- The ability to take ownership for projects and work to time limits
- Well organised and ability to multi-task
- Excellent written and verbal communication skills

## Qualifications

Applicants must currently be studying Computer Science, Software Engineering, or a related degree. Applicants must also have an industrial placement as part of their course and be working towards a 2:1 or above in their chosen degree.
